

Centralized Data for Better Business Insights.

Deploy High Performance Data Pipelines Anywhere

CData Sync is a powerful, no/low-code data integration solution. With CData Sync, you can quickly integrate and consolidate organizational data from any source, cloud application, or on-premises system and leverage that data for reporting, operational excellence, customer success, and other business initiatives. Easily build data pipelines to cloud data targets, such as data warehouses, data lakes, databases, and applications; move data across and within cloud ecosystems; and replicate that data back to mission-critical on-premises applications.

Simple to use

Point-and-click configuration and fully-managed connectors simplify the data integration process so you can focus on vital business operations.

Deploy anywhere

Move all your data to the targets you choose – no matter where they are. CData Sync supports the replication of data from cloud to cloud, on-premises to cloud, and cloud to on-premises.

ETL without the hassle

Quickly and easily create ETL and ELT data pipelines with a user-friendly no/low code approach. Call advanced dbt Core and dbt Cloud transformations or utilize SQL within CData Sync for custom transformation capabilities.

Say goodbye to fragmented data

Integrate your data with near real-time incremental updates and Change Data Capture capabilities to ensure that your data is fresh and ready for business use.

Data where and when you want it

- ✓ Easy cloud or on-prem installation and implementation
- ✓ Access data from over 250 sources
- ✓ Quickly align cloud and on-premises data

- ✓ **Universal connectivity** – Easily connect to hundreds of cloud applications and on-premises data sources.
- ✓ **Intelligent replication** – Deliver high-performance data pipelines based on CDC, full, or incremental replication with no impact on source systems.
- ✓ **Flexible deployment** – Deploy your data pipelines when and where you want, in the cloud and on-premises.
- ✓ **Secure access** – Fully encrypted data transfer and no storing of data within Sync guarantees your data is always secure.
- ✓ **Flexible transformations** – Supports dbt Core, dbt Cloud, and custom SQL transformations for data in-flight or at rest.
- ✓ **Kubernetes support** – Deploy in Kubernetes environment for high availability (no downtime), scalable clustering, and backup-and-restore functionality.

- ✓ Easy data enrichment for analysis
- ✓ Extract, Load and Transform
- ✓ Predictable, connection-based pricing

CData Software – Leading Provider of Data Access & Connectivity Solutions

Our mission is to simplify the way that users and applications connect with data. We offer a straightforward approach to integration, with easy-to-use data providers, drivers, and tools available from any technology capable of interacting with major database standards.

Our drivers are universally accessible, providing access to data through established data standards and application platforms such as ODBC, JDBC, ADO.NET, OData, Snowflake, Salesforce, Excel, etc. This approach allows businesses to realize the substantial benefits and cost savings of integration while reducing complexity and expense.
